Kinesthetic Vocabulary Activities Your Child Will Love: In Just 27 Days Improve Your Kinesthetic Child's Vocabulary and Reading Comprehension can help end your frustration as a parent. It provides answers to the burning questions tens of thousands of parents and teachers of kinesthetic children and teens have asked me, including: How do I develop my kinesthetic child or teen's vocabulary when he or she cannot sit still and thinks vocabulary is boring? Kinesthetic learners learn vocabulary using different strategies and activities from learners of other learning styles or brain styles such as visual learners, auditory learners, or tactile learners, whether right brain or left brain preference. Students with a right-brain preference learn differently from those with a left-brain preference. If traditional methods of learning vocabulary words are not working for your kinesthetic child (K-12), it could be that the teaching method does not match your kinesthetic child or teen's method of learning. These techniques have worked for students diagnosed or suspected of having ADHD or ADD also. If you are looking for fun, engaging kinesthetic vocabulary activities for a kinesthetic learner of any age from pre-school, pre-K, or grades K-12, college, or adult, then this book will provide you activities that have made a difference in only 27 days. These kinesthetic vocabulary lessons and activities can accelerate and improve your child or teen's vocabulary and reading comprehension. These tested and proven activities have worked with tens of thousands of children and teens of all ages around the world. These activities will engage your kinesthetic child or teen of any age in fun activities while improving vocabulary and raising reading comprehension. Why...
