Excerpt: . . . which the universal nature, or the system of further differences charged with the universal nature, is referred to reality. In Deduction par excellence the Real presents itself as qualified by an intelligible system--e. g. by mathematical attributes; and further differences are referred to reality as constructed by and out of this system. It may be doubted whether Newtons discovery of Gravitation was Inductive or Deductive. That in process it was largely deductive there is of course no doubt. The popular story however, about the falling applex, would indicate, if true, an inductive aspect--that of a problem set by concrete data, and resolved by analysis and hypothesis. But we must not suppose Newtons mind to have been as empty of mathematical generalisations as our own. He probably brought a systematised qualification of Reality, drawn from elements in the researches of previous mathematicians, to meet the...
