

Modern Aspects of Electrochemistry 45 (Paperback)

Filesize: 8.17 MB

Reviews

This book will be worth purchasing. This is for anyone who statte that there had not been a worthy of looking at. Your daily life span will likely be convert when you total looking over this ebook.
(Aidan Jerde DVM)

MODERN ASPECTS OF ELECTROCHEMISTRY 45 (PAPERBACK)**DOWNLOAD**

Springer-Verlag New York Inc., United States, 2014. Paperback. Book Condition: New. 2009 ed.. 203 x 127 mm. Language: English . Brand New Book ***** Print on Demand *****. This volume contains 7 chapters. The topics covered are the cathodic reduction of nitrate, for which the key issues are product selectivity and current efficiency; a discussion of ionic liquids known as molten or fused salts in key industrial processes; the properties of nanowires made of metals and semiconductors by means of electrodeposition into porous templates and template synthesis; and an overview of a range of alloys used in electroplating, and trends in ammonium electrolysis. Also, included is a review of the applications of synchrotron x-ray scattering to the electrochemical interphase. Chapter 1 by Celia Milhano and Derek Pletcher reviews the cathodic reduction of nitrate as a truly fascinating reaction since processes for nitrate removal from drinking water and effluents and reducing nitrates in nuclear waste is an essential step in nuclear waste disposal. The authors also review electrochemical membrane technology not involving the cathodic reduction of nitrate. In Chapter 2, the authors discuss substances called ionic liquids, and the fact that this is really a new more modern term for molten or fused salts. However, the label of ionic liquids is usually applied to the liquid state of salts at or near room temperature, which is a way to differentiate low-melting salts from higher melting cousins. These molten or fused salts form the basis of several key industrial processes, and this chapter is primarily devoted to the non-haloaluminate ionic liquids as reviewed by Tetsuya Tsuda and Charles L. Hussey.
