While introducing the current research in this rapidly changing field, the text also introduces critical thinking exercises that highlight important phenomena and provide an engaging firsthand view of the everyday relevance of research in cognition. The book has three main threads that serve as unifying themes for current research in the field: Cognition and Neuroscience; Cognition and Consciousness; and Cognition and Individual Differences. A 'story' introduces the book and is continually referred to throughout in installments, highlighting the application of the information and providing a useful organizing tool. 608 pp.
