The Quadruple Object

By Graham Harman

John Hunt Publishing. Paperback. Book Condition: new. BRAND NEW, The Quadruple Object, Graham Harman, In this book the metaphysical system of Graham Harman is presented in lucid form, aided by helpful diagrams. In Chapter 1, Harman gives his most forceful critique to date of philosophies that reject objects as a primary reality. All such rejections are tainted by either an undermining or overmining approach to objects. In Chapters 2 and 3, he reviews his concepts of sensual and real objects. In the process, he attacks the prestige normally granted to philosophies of human access, which Harman links for the first time to the already discredited Meno's Paradox. In Chapters 4 through 7, Harman brings the reader up to speed on his interpretation of Heidegger, which culminates in a fourfold structure of objects linked by indirect causation. In Chapter 8, he speculates on the implications of this theory for the debate over panpsychism, which Harman both embraces and rejects. In Chapters 9 and 10, he introduces the term ontography as the study of the different possible permutations of objects and qualities, which he simplifies with easily remembered terminology drawn from standard playing cards.
