Not illustrated. 1880 Excerpt: .is compactly arranged by interchanging the headings of the columns containing these elements at the top and bottom of the page, and reading the top reading for courses from 0 to 45, and the bottom reading for courses from 45 to 90. This table may be used for a great number of problems depending for their elation on the relation of the several parts of a rightangled triangle, and since all the relations between any two quantities may be expressed as functions of some angle in terms of the sine, cosine, or tangent; it may be used, in fact, as a general proportional table. In these Tables the course is found at the top of the Table, when under 4 points or 450; but at the bottom of the Table, when it exceeds 4 points or 450. The first column contains the distance to 60 miles, the second column contains the difference of latitude, expressed in minutes and tenths, and the third column, similarly expressed, contains the departure; but if the course exceeds 4 points, or 45, the second column contains the departure, and the third column the difference of latitude. The other columns are a continuation of the former, exactly upon the same principle, and extending to 300 miles of distance. (See Tables I and II, Nokeb or Rapkk.) USE OF THE TABLE. 268. Given the course and distance, to find the difference of latitude and departure. EULE LXm. With the Course open the Tables,...
